

This is always a fantastic term where children are settled in the routines of the class and often make big leaps forward in their learning.

You can help your child incredibly by finding just 5 minutes a day to read a few pages of their reading book with them. Reading is a superpower and in Woods Corner it is one of the most important things we learn to do.

Science

We will be learning about animal food chains and the five human senses.

Computing

We are learning about computer programming.

RE

We will be learning about different stories in the Bible and why the Easter story is important to Christians.

English

We will continue to reinforce our phonics learning in our daily writing. Accurate use of full stops, commas and capital letters will be a focus. We will use Colourful Semantics to support the children's writing. It promotes a deeper understanding of sentence structure, develops vocabulary and increases confidence. This term we will:

- expand their vocabulary.
- learn how to answer questions.
- develop use of nouns, verbs, prepositions and adjectives.
- Improve their story-telling skills.

Woods Corner Class

2025-26

Spring Term

Relationships

I will know that every family should be respected. I will know the importance of being a good team member.

PE

Our focus is Gymnastics this term.

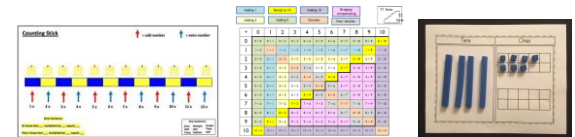

Reading

Your child will read their Guided Reading book daily at school and then bring it home to read the following week. Alongside this they will have a library book of their choice.

Maths

We will be looking at addition and subtraction patterns and increasing their confidence in using their maths fluency knowledge of numbers within 10 to solve a range of equations. Year 2 will be also embedding their understanding of multiplication.

History

We are learning about Titanic this term and how to find information about the past through photographs and artefacts.

Geography

We will be learning about the world's seven continents and five oceans.

We will be learning about the British artist and photographer Richard Shilling and developing our sculpting skills using natural resources.

DT

We will be designing, making and evaluating joining techniques to make models around our learning of the Titanic.
